

VITAGRIMIX® BREEDER

The Key to Breeder Health, Quality Hatching Eggs, and Superior DOC

AJS AGRINUSA

Description

VITAGRIMIX® Breeder is a vitamin premix supplement specially formulated for breeder chickens. This product provides complete essential vitamins for parent stock, helping improve health and immunity. With its optimal vitamin composition, **VITAGRIMIX® Breeder** supports maximum breeder productivity—from increasing hatching egg production and fertility to producing healthy, high-quality Day-Old Chicks (DOC).

Composition

Vitamin A	≥ 21,600,000	IU/kg
Vitamin D3	≥ 5,400,000	IU/kg
Vitamin E	≥ 108,000	IU/kg
Vitamin K3	≥ 8,100	mg/kg
Vitamin B1	≥ 6,300	mg/kg
Vitamin B2	≥ 21,600	mg/kg
Vitamin B6	≥ 9,000	mg/kg
Vitamin B12	≥ 54,000	mcg/kg
Vitamin B3	≥ 90,000	mg/kg
Calcium pantothenate	≥ 27,000	mg/kg
Folic Acid	≥ 3,600	mg/kg
Biotin	≥ 450,000	mcg/kg

Benefits

Dosage and Administration

Dosage: Use 0.5 – 1 kg per ton of feed to support breeder health and optimize hatching egg production. The standard dosage is for daily maintenance, while under special conditions such as heat stress, decreased fertility, or increased metabolic needs, the dosage may be increased upon recommendation by a nutritionist or veterinarian.

Administration: Mix evenly into the main feed during the formulation process to ensure homogeneous nutrient distribution in every feed particle. Direct administration without mixing is not recommended as it may disrupt nutritional balance and reduce vitamin effectiveness.

Warning: This product is designed for feed premix use only and is not intended for direct oral administration or through drinking water. Use according to the recommended dosage to maintain optimal breeder performance, sustain hatching egg production, and improve DOC quality.

Packaging and Shelf Life

Packaging: Packed in a 25 kg industrial-grade bag. The packaging is specially designed to provide maximum protection against moisture, contamination, and physical damage during transportation and storage.

Storage: This product is hygroscopic. Once the packaging is opened, it is recommended to use the entire content immediately or reseal it tightly to prevent moisture absorption, which may reduce stability and nutritional quality. If the product is not used entirely at once, ensure the package is tightly closed and used within a maximum of 1 month. Store at a temperature not exceeding 30°C in a cool, dry, clean place, and protect from direct sunlight to maintain product quality and effectiveness.

Shelf Life: Has a shelf life of 18 months from the date of production if stored in sealed packaging and in appropriate storage conditions. It is recommended to use the product before its expiry date to ensure optimal vitamin potency.
