

VITAGRIMIX® BROILER

Maximize Growth, Strengthen Immunity, Optimize Harvest

AJS AGRINUSA

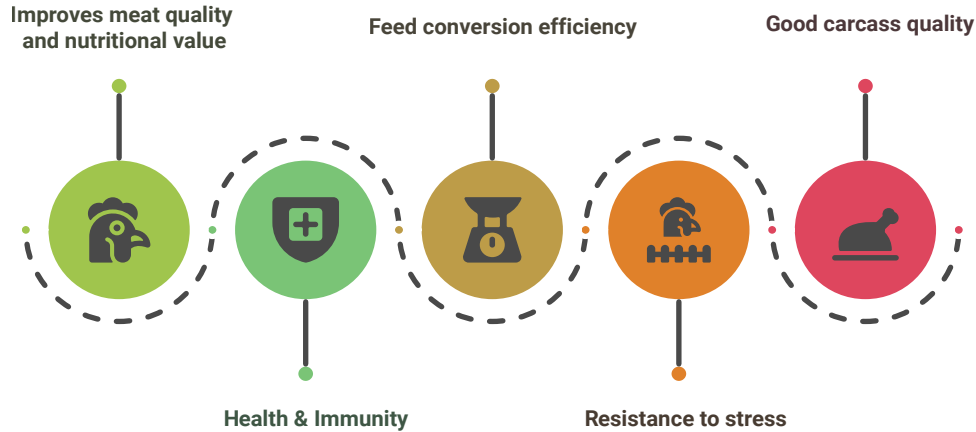

VITAGRIMIX® BROILER

Description

VITAGRIMIX® Broiler is a high-quality vitamin premix specially formulated for broiler chickens. This product provides complete essential vitamins to maintain immunity and optimal growth in broilers. By using this premix, farmers can ensure their broilers receive sufficient micronutrients and vitamins. As a result, broiler chickens can achieve maximum productivity according to their genetic potential.

Benefits

Composition

Vitamin A	≥ 18,900,000	IU/kg
Vitamin D3	≥ 5,400,000	IU/kg
Vitamin E	≥ 45,000	IU/kg
Vitamin K3	≥ 6,300	mg/kg
Vitamin B1	≥ 4,500	mg/kg
Vitamin B2	≥ 16,200	mg/kg
Vitamin B6	≥ 6,300	mg/kg
Vitamin B12	≥ 36,000	mcg/kg
Niacin	≥ 81,000	mg/kg
Calcium pantothenate	≥ 25,200	mg/kg
Biotin	≥ 2,250	mg/kg
	≥ 108,000	mcg/kg

Dosage and Administration

Dosage: Use 0.5 – 1 kg per ton of feed (equivalent to 0.05–0.1% of total feed) to support optimal growth in broilers. The standard dosage is used for daily maintenance, while under special conditions such as heat stress, disease, or increased metabolic needs, the dosage can be increased up to 1 kg per ton of feed based on the advice of a nutritionist or veterinarian.

Administration: Mix evenly into the main feed during the formulation process to ensure a homogeneous distribution of nutrients in each feed particle. It is not recommended to administer directly without mixing, as this may disrupt nutritional balance and reduce supplementation effectiveness.

Warning: This product is designed as a feed premix and is not intended for direct oral administration or through drinking water. Use according to the recommended dosage to support healthy, fast-growing, and efficient broiler performance for optimal results.

Packaging and Shelf Life

Packaging: Packed in a 25 kg industrial-grade bag. The packaging is specially designed to provide maximum protection against moisture, contamination, and physical damage during transportation and storage.

Storage: This product is hygroscopic. Once the packaging is opened, it is recommended to use the entire content immediately or reseal it tightly to prevent moisture absorption, which may reduce stability and nutritional quality. If the product is not used entirely at once, ensure the package is tightly closed and used within a maximum of 1 month. Store at a temperature not exceeding 30°C in a cool, dry, clean place, and protect from direct sunlight to maintain product quality and effectiveness.

Shelf Life: Has a shelf life of 18 months from the date of production if stored in sealed packaging and in appropriate storage conditions. It is recommended to use the product before its expiry date to ensure optimal vitamin potency.
